

CamTronics MiniFlex®

Mini Sewer Camera

The Miniflex® is a flexible mini sewer camera that has been specially developed for inspecting small diameter pipes, drains and tubes (1inch - 4inch). Mostly found in for example (for plumbers the CCTV sewer camera!) sanitary rooms, plumbing and kitchens. This kind of sewer inspections needs flexibility due to the width of the pipe including the numerous bends and the position to maneuver into and to be able to carry out a camera inspection with a mini sewer camera.

The Miniflex® sewer camera is equipped with a unique patented flexible element between the camera-head and the pushrod. This, combined with the innovative bullet-shaped camera head, provides an easier transit through drains and pipes. Extensive real life tests have proven that even right-angle bends in diameters as of 1in. are taken smoothly. The sophisticated sewer camera-head design keeps the lighting(LED) ring above the bottom, which minimizes reflection, and this together with the carefully selected lens gives the Miniflex® camera a large "viewing angle" and a sharp image, even in larger diameters till 4in. diameter. To make it a complete package, the Miniflex® is standard equipped with a 512Hz transmitter, meter-counter and display with recording functions for video and photo on SD-card.

Features

- Flexible mini sewer camera-system
- Unique flexible element(PUR) for right-angle bends
- Sewer pipeline inspection of 1inch-4inch pipes (plumbers services)
- Oval sewer camera head for smooth transit
- Special lens with large viewing angle (100°)
- Sophisticated lighting ring for minimal reflection and a better image
- Metercounter
- Textwriter On Screen Display
- Standard with transmitter (512Hz)
- Standard with Li-ion battery pack (max. 7 hours)
- Exchangeable push cable from Polyamid, which the user can easily renew the cable by himself (50, 66, or 98 feet)
- Video-Out facility allows you to adapt to a laptop or another monitor

Specifications

Monitor	Clear 5.6" display
Transmitter	512Hz

Order Information

Part Number	
CT.MR100	MiniFlex® 100ft (30M) Unique flexible push cable, 19.5mm (.75) dia camera head
CT.MR67	MiniFlex® 67ft (20M) Unique flexible push cable, 19.5mm (.75) dia camera head
